

Features

- Woven glass fibre fabric
- Hard wearing material container
- Portable and easily stored
- Eyelet for maintenance tag
- Blanket temperature rating 550 'c - 1022 'F

Description

Fire Blankets are ideal where small fat or cooking oil fires are a risk. They can also be used if a person's clothing has caught fire. Correct application will reduce the supply of oxygen to the fire, smothering it either permanently or until more effective fire-fighting equipment can be employed.

Approvals

AS/NZS3504 - 2006

Fire Blankets

Application

Class A Fire Ordinary Combustibles

Class F Fire Cooking oils and fats

Class E Fire Electrically energised equipment
